Vice-President McQueen Pays Visit to Fabyan Well

Confirms Report of Heavy Black Oil.

In an interview with the Edmonton Journal, Mr. McQueen confirms the Times report that oil had been found at a comparatively shallow depth, also that a better grade of oil is expected at a lower depth. He does not state the nature of the repairs that are required but gives assurance that drilling will be resumed.

Following is the report taken from last Thursday's Journal.

Conditions at Fabyan

Official information secured from Mr. McQueen removes the mystery concerning the Fabyan well and confirms the Journal's statements as to gas pressure being largely responsible for what happened there recently.

This well is now down to 1940 feet and drilling was suspended to make repairs to equipment. Gas was struck at 1840 feet and it was cased off. At 1925 feet a little heavy black oil was brought in. The tremendous gas pressure at this point was responsible for the black oil being brought up, resulting in the stories of a strike.

What the company is after is a light oil and that has not been obtained. In about two weeks when repairs are completed, drilling operations will be resumed, so the reports of the well being capped on account of an oil strike are clearly without foundation. "We have not bought one lease," stated Mr. McQueen, when asked about the reports of purchases of lands in the Wainwright district.

At Pouce Coupe the well is down 2,650 feet. Gas was struck at 1,765 feet but it was cased off. There was some trouble at this owing to tools being lost, but drilling is now being resumed.

At Monitor, Alberta, the well is down to 2,500 feet and drilling is going ahead, while at Coalpur the depth already reached is 525 feet. At Willow Creek, near Nanton, the depth already reached is 2,515 feet and drilling is proceeding.

The well at Unity, Saskatchewan, is being abandoned at 2,905 feet, while drilling at the well at Consul, near the southeast corner of Saskatchewan is continuing. The present depth is 3,500 feet.

No News From The North
No news has been received as to drilling operations at the company's four wells in the Fort Norman district. The first river mail is expected some time during the latter part of July.

The Imperial Oil party visited the Sweet Grass field in northern Mon-

tana and found all the indications of an oil field there. At present there are two wells producing oil, these being the Gordon-Campbell well at Kevin and the Sunburst well about twelve miles south of the border. There are about twenty-five drills in the field, while eight have actually commenced operations. It was stated by some that the producing wells were yielding 100 barrels a day.

The officials also inspected the gasoline extraction plant which the Royalite company, a subsidiary of the Imperial Oil, has near Okotoks. This company has a drill near Dingman and is about to make another location.

Costly Drilling Campaign

When asked for a statement on the general drilling operations, Mr. McQueen referred to what President Stillman had stated to the Calgary Herald. The president then said, in part: "When the company inaugurated the present costly drilling campaign, they did not look for immediate success for the simple reason that, geologically, no section of the country presented much more favorable conditions than any other part."

"That is to say, there were no thoroughly defined geological structures while in addition to this the company were pioneers with very little evidence from previous boring to guide them. Therefore, the company does not regard the delay in opening up the field as being in the slightest degree condemnatory of the country in general."

"There has been no outstanding development in our drilling operations since I was last here," said Mr. Stillman.

Of National Importance

"There appears to be a prevalent opinion, however, that our officials sometimes withhold information of a promising nature. I think that this impression is generally fostered by those who hope to make a speculative profit through the disposal of leases adjacent to our supposed finds. All that I have to say is, as I said before, we are engaged in a work which we believe to be of national importance and when any development of a conclusive nature occurs, which will lend encouragement to our faith in the petroleum resources of this country, we shall be glad to take the public into our confidence."

for their services, as hitherto the conduct of the affairs of our company has taken considerable of their time, without any compensation whatsoever, and we trust that in the near future it will be necessary that another general meeting be called in connection with these matters.

R. B. McCleish,
President.

After the report had been approved the election of officers took place, the retiring officers being re-elected. They are: R. B. McCleish, president; H. L. McMinis, M.D., secretary; directors: R. W. Jones, T. J. Sugars, and S. D. Hogan.

The Grattan Oil company is an Edmonton organization. It was incorporated early in 1914 and began drilling in May of that year. The location is in the valley of the Battle River about nine miles south east of Irma and is about two miles south of Hawkins station on the G. T. P. line. Hawkins is the next station east of Irma and is the second station west of Wainwright. The first station west of Wainwright is Fabyan. In 1914 and 1915 the company drilled to a depth of 1600 feet. They were compelled to give up the well as the tools stuck. In 1916 they began drilling another well, and at a depth of 1910 feet they struck a heavy flow of gas—about five million feet per day. They were again compelled to suspend drilling operations. Later on the company entered into an agreement with the Imperial Oil company to have that company drill a part of the Grattan company's leasehold at Fabyan. That is the well alluded to in the report.

The Company owns twenty and three quarter sections of oil leases principally in Townships 45, Ranges 8 and 9. Three sections are in 45 Range 7 and two in 44 Range 8. This is practically the only company organized in 1914 that is still in existence and that has not been re-organized. The leases owned by it are the most promising in Alberta and we believe the most valuable.

STEAM CLOUDS OVER DERRICK OVER OIL WELL
With the derrick concealed in a cloud of steam, operations at the Mutual Oil and Gas company's well near Pidgeon Lake were temporarily suspended recently. Work was resumed after casing had been put down further, in case that an oil or gas flow was brought in.

It appears that this is a "mystery well" for the queer developments have not yet been accounted for by drillers or geologists. The assumption is that hot springs are in the vicinity, although this fact has not yet been established. Reports show that the drilling was proceeding when it was noticed that the drill passed through some material that offered but slight resistance. This continued for some time and then the drill was reversed.

Following this action the whole derrick became covered in a cloud of steam that came up quickly and startled the drillers. Fears that the drill was into the hot regions became fixed when the driller J. P. Scott, burnt his hand when he touched the drill.

The geologist, Professor Warren was sent for but he has not yet been able to account for the occurrence. It is assumed that the presence of hot springs was responsible for the strike for there are "mud volcanoes" in the vicinity. At one point it was necessary to erect a fence for the protection of cattle.

The well is now down to between 300 and 400 feet, and at last reports operations were going ahead. As there are oil seepages about, there is considerable confidence in good results being obtained.

U. F. A.

Don't forget the U. F. A. meeting in Co-op. Hall, Saturday afternoon July 15th, at 2:30 P. M. Delegates will be elected for the U. F. A. and U. F. W. A. conventions in Wainwright.

The U. F. A. and U. F. W. A. Political Convention of the Wainwright constituency will be held at Wainwright on Monday, July 17th starting at 10 A. M.

The U. F. A. and U. F. W. A. Political convention for the Federal constituency of Battle River will be held on Tuesday and Wednesday, July 18 and 19th at Wainwright. Mr. J. R. Love, M.L.A. and H. L. Spier, member for Battle River will attend.

All U. F. A. members are requested to attend.

Grattan Oil Company Elected Officers; Heard Yearly Report

A general shareholders meeting of the Grattan Oil Co. was held in Edmonton on Friday evening, the president, R. B. McCleish, in the chair. The following report was presented by Mr. McCleish:

"Since our last general meeting there have been changes affecting the relations and conditions of our company, all of which, we are pleased to report have resulted to our advantage.

"In the first place, the terms and conditions of the agreement between our company and the Viking & Battle Creek Oil Co. were violated by the failure of the latter company to maintain our leases in good standing, and also by their inactivity in the development of our interests in the Grattan field, the former rendering our leases liable to cancellation by the department at Ottawa had they not been watched and guarded by your directors with the greatest care; and the latter causing the Grattan holdings to remain practically idle as far as attempted development of oil interests and proving the field as a commercial producer were concerned.

"For the above reasons we deemed it advisable to cancel this agreement and after considerable time, and with much difficulty and trouble we succeeded in cancelling this agreement, and immediately thereafter the Grattan company entered into an agreement with the Imperial Oil Co. in June, 1921, embodying practically the same terms and conditions as were contained in the former agreement with the Viking & Battle Creek Oil Company.

"The result of this agreement with

the Imperial Oil company has been very satisfactory to us. Our leases are all in good standing and in our possession and we have no doubt whatever of their being kept in that condition under the terms of this agreement.

"At Fabyan drilling operation have been carried on, and are now being carried on, and a depth of 1940 feet has been reached. A strong pressure of gas was encountered at a depth of 1780 feet, much stronger than in the old Grattan well, which retarded drilling operations considerably.

"The location of the well where the Imperial Co. is now drilling is distant from the first well about five and one half miles, and this heavy pressure of gas from these two wells this distance apart proves this field to be at least a very strong gas field.

"In the course of drilling in the present well there were slight showings of oil, but there is nothing in particular at the present time to report in regard to oil production in this field, yet we believe the prospects in this respect are very favorable, and we hope they will strike oil in the next few hundred feet. The conditions of drilling operations in the new well are practically the same as were found in the old Grattan well, with one distinct exception that the pressure of gas in the new well is much greater than in the old one.

"We are sufficiently optimistic that we dare hope in the near future it will be necessary for the Grattan company to provide offices in which to carry on its business, and that your officers may receive proper remuneration

Burning Up Money

The fire loss in Canada during 1921 amounted to more than \$45,000,000 and exceeded that of any previous year in the history of the country. Returns for the present year indicate that conditions are going from bad to worse. During the first four months of 1922, losses have amounted to \$79,205,000, or almost \$5,000,000 per month.

The above figures are taken from a new publication called "Fire Control," published by the Department of Insurance at Ottawa, which has been forced to take notice of the rapidly increasing fire waste in Canada and has become impressed with the necessity of calling public attention most forcibly to it. If the enormous fire loss in Canada each and every year is to be lowered it is imperative that the general public be aroused to a greater sense of individual responsibility for existing conditions.

It is estimated that directly and indirectly, without taking into account loss of life and injuries resulting from fires, Canada's fire burden in 1921 cost the enormous sum of \$98,435,470. This great sum of almost one hundred million dollars is paid directly by property owners, but subsequently, through the channels of business, every individual in Canada bears his or her share of the burden. So distributed it amounts to \$11.25 per capita of the population and constitutes a tax of more than \$5.00 per annum upon the average family. Other taxes produce something in the way of service, but this fire tax of one dollar per week per family yields no return.

There is a popular notion that the loss sustained in fires is, in the vast majority of cases, fully covered by insurance. Newspaper accounts of fire disasters are invariably concluded with the words: "Loss fully covered by insurance." We take it for granted that this means there is complete compensation for all waste and destruction caused by the fire. There is no greater fallacy. The losses resulting from a fire extend in so many directions that they can never be fully covered by insurance.

Insurance, at the most, can be collected only for the goods and property actually destroyed. There is no insurance covering the cost of cleaning up the debris preparatory to re-building; none for time lost in productive work while re-building or seeking a new location; none for profits lost on work that might have been done but which, owing to the fire, went to a competitor; none for the costly disorganization of business which results; none for loss of employment suffered by employees; none for the public who through decreased production may be called upon to pay higher prices. Yet these losses have to be paid for. Who pays if the insurance companies do not? Why, the public of course. And even if such losses were covered by insurance, the public would still pay through still heavier premiums. The only way for the public to escape these charges is to reduce the fire waste.

In the Western Provinces of Canada where the bulk of the population live in rural parts, and where therefore it is difficult, and frequently impossible, to supply adequate fire-fighting equipment, it is especially important that all possible precautions against fire be taken and the utmost care exercised at all times. If a fire starts on the farmstead, or in a small village or hamlet, the total destruction of the building is almost a foregone conclusion because there are not, and cannot be, the efficient fire-fighting apparatus available in cities and the larger towns.

However, with the new general installation of rural telephones connected with local town and village centres, it should be possible for adjacent rural districts to unite with the town or village in providing a light auto fire equipment, combining a chemical and pumping engine and hose carriage, which would provide protection not only for the small town or village but for a considerable section of the surrounding country as well, and the rural population thus be reasonable sure that a telephone call will find the nearby town or village fire department equipped and ready to serve them promptly. The small town or village cannot, of itself, stand the expense of providing such equipment, but through a union of forces with the adjacent rural sections such equipment could be provided without imposing too heavy a burden on anybody.

Farm homes can easily be equipped with automatic chemical extinguishers at very low cost, a very simple apparatus which can be used by a woman, or a child if necessary. If a blaze is started it can, through such means, be quickly smothered before it gets headway, where nothing can check it.

However, there is no better way of avoiding loss by fire than to prevent fire. Once again, it may well be urged that an ounce of prevention is worth a pound of cure. The adoption of all reasonable precautions against a fire being started is, after all, the cheapest and most effective of all measures to reduce the fire waste which today constitutes one of the heaviest taxes imposed upon the people of this Dominion.

World Wheat Supply Low

Only North America Has Surplus to Supply Demand

The world wheat stocks by July 1, will be lower than for several years, according to an analysis of the situation issued by the Commerce Department.

Both Argentina and Australia, the department explained, have considerably less wheat than last year, the United States carry-over will be light, and only Canada has considerable stocks on hand. A larger de-

mand than last year, it was declared, was indicated by the upward trend of consumption, while the prospects are for a smaller crop.

Until next February, the department said, "the international trade will be largely dependent for supplies on the surplus of North America, and a limited quantity from India. With Russia entirely out of the export trade, North American wheat is in a relatively strong position."

Switzerland is electrifying her rail ways, to save importing coal.

Human Magnets

Experiments Have Proved Certain People Possess Magnetic Powers
Some experiments that are being carried out by a German doctor show that certain people possess magnetic powers like those of an ordinary magnet.

The magnetism in the hand of one person examined was so marked that on laying the hand on a paper sprinkled with iron filings the filings arranged themselves along the "lines of force" in a way that most of us have seen done with a real magnet.

The interesting point is that, after a magnetic person has done some exercise, his magnetism seems to increase.

Dr. Grunwald, who is conducting the experiments, has made an instrument that will measure a person's magnetism.

When Your Appetite Fails This Is What You Need

When the very thought of eating makes you feel dizzy, when you're run down, stomach in bad shape—you need a real housecleaning with Dr. Williams' Pink Pills. They tone up the liver, assist the stomach and improve digestion. The taste becomes aware of new flavors in food you never noticed before. You'll look and feel a whole lot better after using Dr. Williams' Pink Pills. Many folks used this fine old remedy and nothing else and kept in the pink of condition all the time. Get it at dealers, or The Cattaraugus Co., Montreal.

What She Knew

A youthful and blushing bride reduced the aged grandmother of the groom to a state of collapse not long ago. When the old lady asked her if she could cook, the bride answered, "Not very well, but I know that you bake inside the stove and boil on the outside."

NEW STRENGTH FOR WEAK STOMACHS

Indigestion Disappears When the Blood Supply Is Enriched

The urgent need of all who suffer from indigestion, and who find that unable to perform its usual function, is a tonic to enrich the blood. Pain and distress after eating is the way the stomach shows that it is too weak to perform the work of digesting the food taken. In this condition some people foolishly resort to purgatives, but these only further aggravate the trouble.

New strength is given weak stomachs by Dr. Williams' Pink Pills, because these pills enrich and purify the blood supply. This is the natural process of giving strength and tone to the stomach, and it accounts for the speedy relief in stomach disorders that follows the use of Dr. Williams' Pink Pills. The appetite revives, food can be taken without discomfort and the burden and pains of indigestion are dispelled. Dr. William Johnson, a prominent business man of Louisville, N.S., bears testimony to the value of these pills in cases of this kind. He says: "I was attacked with indigestion accompanied by severe cramps in the stomach. I was prescribed for by the family doctor, but with very little benefit. Then I tried some of the advertised remedies but with no better result. Indeed, my condition was growing worse. Then I read of the case of a man who praised Dr. Williams' Pink Pills whose condition was similar to my own, and I decided to try this medicine. The result, I think, was amazing as the use of six boxes restored me to my former good health. I can therefore warmly commend the use of this medicine for stomach troubles."

You can get these Pills from any medicine dealer or by mail at 50 cents a box or six boxes for \$2.50, from The Dr. Williams Medicine Co., Brockville, Ont.

A Return to Good Times

When we learn that our great London hotels are experiencing something of a boom, there is little difficulty in putting two and two together. The wheels of trade have begun to revolve again. Every week sees an added momentum. Soon they will be turning at full speed. These seemingly casual gatherings in foyers and restaurants mean much. They mean orders, trade, business of all kinds. And that means an end to unemployment and a return to prosperity. Truly the barometer points to a "set back."—London Daily Express.

A safe and sure medicine for a child troubled with worms is Mother Graves' Worm Exterminator.

A Gallant Effort

"The Rules of the Road" as posted in Tokyo, are printed in the original English by the Fifth Avenue Coach Company. They are worth it.

The first of these excellent rules reads: "At the rise of the hand of the policeman stop rapidly." Another considerable regulation bids the automobilist "Beware the wandering horse that he shall not take fright. Do not explode an exhaust box at him. Go soothingly by." And there is much discretion in the order, "Go soothingly on the green mud as there larks the speed demons." True indeed!—New York Sun.

Prize Advertisement

Literature Issued by Department of Immigration and Colonization Attracts Attention

The Department of Immigration and Colonization are admitting some elation over the fact that one of the regular advertisements issued by the department and appearing in a prominent agricultural paper published in Iowa has been the occasion of one of the prizes offered by the publisher of the paper mentioned for letters on the best advertisement appearing in his paper. The prize letter suggested by the advertisement of the Canadian Department of Immigration and Colonization reads as follows:

"Western Canada offers health, wealth and 160 acres farm free, fertile land at fifteen and thirty dollars per acre, is, in my opinion, the best advertisement in the April issue of the Iowa and Co. Belt Farmer. Health, wealth, land and a home, is the goal that every man and woman of ambition is striving for, and it all can be found in Western Canada. Land is the basis of all wealth, and all other advertisements would be useless if it were not for the wealth created from the soil. Government land and homestead grants have been a thing of the past in Iowa for over forty years, fertile land at fifteen and thirty dollars an acre for gone thirty years. And the next generation will never read an advertisement like Canada offers. This Canada land advertised by the Canadian Government may never reach five hundred dollars an acre, but who knows?"

"Little did father think in 1844, when homesteading land in Iowa and paying the Government \$1.25 an acre, that this same land would sell in 1920 for \$500 an acre."

The letter was written by A. P. Besser, Elkhardt, Iowa, and the advertisement referred to is one of a regular series carried by the Department of Immigration and Colonization in the agricultural press in the United States.

Sores Heal Quickly.—Have you a persistent sore that refuses to heal? Then, try Dr. Thomas' Electric Oil in the dressing. It will stop sloughing, cut away the dead flesh, draw out the pus and prepare a clean way for the new skin. It is a recognized healer among old and numbers of people can certify that it healed where properly applied.

A Gigantic Grape Vine

Planted in 1775 and Covers 10,000 Square Feet

One of the oldest grape vines in the world is to be found in California. It was planted in 1775 and it is still bearing abundance of fruit. Towards the end of the eighteenth century Spanish missionaries introduced the European red grape trees into the United States. They planted the vine in question at San Gabriel, and it now covers a surface of 10,000 square feet. Its numerous branches are supported by trellis work which is necessary in view of the fact that many bunches of grapes weigh from five to six pounds. Notwithstanding its great age, the vine at St. Gabriel's Mission last year bore fruit to the extent of more than ten thousand pounds.

For Sprains and Bruises.—There is nothing better for sprains and contusions than Dr. Thomas' Electric Oil. It will reduce the swelling that follows a sprain, will cool the inflamed flesh and relieve the pain. It will take the ache out of a bruise by counteracting the inflammation. A trial will convince any who doubt its power.

Indicative of Prosperity

No Country Shows So High a Percentage of Home Ownership as Canada

According to statistics recently compiled no country in the world shows so high a proportion of home ownership in the cities as does Canada. London, Ontario, heads the list with 80 per cent, or 11,200 of the 14,000 residences, occupied by the owners. Vancouver has 24,000 residences, and 14,400 owners occupying them. Calgary is represented with 13,500 homes, in which 8,100 owners dwell. Toronto is rated as having 36,593 homes, of which 47,579 are occupied by their owners. Halifax with a percentage of fifty-one is shown to have 8,225 homes, occupied by 4,225 owners. Vancouver has 22,129 residences, of which owners occupy 10,271; Edmonton has 12,000, of which 5,400 are owned by their owners; Winnipeg has 23,325, with 12,903 of their owners occupying them. Ottawa has 19,947 and 8,059 owners living in them. Montreal, 134,845, with 6,744 owners occupying them.

The Changing Times
Visitor.—What has become of the veterinary college you used to have here?
Native.—Oh, they long ago turned that into a school for automobile mechanics.—Cincinnati Enquirer.

Minard's Liniment Lumberman's Friend

Business Woman Is Out With Statement Of Facts To Public

"Since taking Tanlac I feel so well I can hardly realize that a short time ago I was in such a wretched condition," declared Miss Alythe Perth, 351 Carlton St., Winnipeg, Man., popular young business woman.

"I had a nervous breakdown which kept me in bed several weeks and left me so bad off I had scant hope of ever getting better. I was very nervous, couldn't sleep and even after I went back to the office I seemed to have no strength. My stomach became disordered and indigestion caused me fearful pains, bloating and shortness of breath. My kidneys also bothered me almost continuously and life was positively miserable."

"But soon after I began taking Tanlac I could see it was doing me a world of good. Seven bottles have relieved me of all my ailments and now my health is just fine. I think Tanlac is simply grand."

Tanlac is sold by all good druggists.

The Smallest Dictionary

Print So Fine Can Only Be Read Through Glass

Weighing less than one-sixth of an ounce, the smallest English dictionary in the world has been located at Ottawa, it is claimed. Joseph Brown, a war veteran, who went overseas with the 42nd Highlanders, is the possessor. He carried the dictionary, a fairly hefty one, right through the campaign. "The pages are a little over half an inch thick. The paper is very fine and the print can only be read through a glass. There are 11,000 pages."

Thinks Swearing All Right

Yes, providing the provocation equals the offence of Jones stepping on the toes of Smith. "Putnam's" Painless Corn Extract, it does lift out corns in a hurry. No corn can last if "Putnam's" is applied. Refuse a substitute, see every where.

No More Crusoes

Wireless Telegraphy Comes to the Rescue of Shipwrecked Mariners

Robinson Crusoe wouldn't need to stay on his lonely island very long nowadays. There can't be any more stories written about castaways and Man Fridays any more.

Wireless telegraphy has done away with "poor old Robinson Crusoe." All ships are being fitted with these wireless outfits, which can send out calls for help far and wide.

A Swedish vessel, Elmlaren, for instance, ran around on the shore of a small island in the Indian ocean. As soon as the crew landed they brought their wireless ashore, fixed it on the top of the highest hill, and began sending out messages. In less than a month after the shipwreck an answer was received, and the crew was rescued.

They left the wireless apparatus on the hill-top for the benefit of any others that might be cast ashore on the lonely island.

Keep Minard's Liniment in the house

Which is Wrong?

A question often asked is, What is wrong with the church? It might as pertinently be queried, however, "What is wrong with the people?" The church of today in various ways, appears to be doing its utmost to fulfil its mission, while many people exhibit either the perversity of spoiled children or the cynicism attached to hardened unbelief.—Hamilton Spectator.

If a woman is unwilling to take in washing and scrubbing to support the family she has no business to marry a man to reform him.

strength. My stomach became disordered and indigestion caused me fearful pains, bloating and shortness of breath. My kidneys also bothered me almost continuously and life was positively miserable."

"But soon after I began taking Tanlac I could see it was doing me a world of good. Seven bottles have relieved me of all my ailments and now my health is just fine. I think Tanlac is simply grand."

Tanlac is sold by all good druggists.

Holds Honorary Degrees

A total of 64 honorary degrees are held by Mue. Currie, the celebrated European chemist and discoverer of radium. Nine of the degrees are from American colleges and universities.

No Rest With Asthma. Asthma usually attacks at night, the one time when rest is needed most. Hence the loss of strength, the nervous debility, the loss of flesh and other evils which must be expected unless relief is secured. Fortunately relief is possible. Dr. J. D. Kellogg's Asthma Remedy has proved its merits through years of service. A trial will surely convince you.

Nearest Stars Still Distant
Man has been able to calculate distance from the earth to some of the stars. The nearest stars are still so distant that it takes the light from them four years to reach us, going at a velocity of 186,000 miles every second.

The use of Miller's Worm Powders insures healthy children so far as the ailments attributable to worms are concerned. A high mortality among children is traceable to worms. These sap the strength of infants so that they are unable to maintain the battle for life and succumb to weakness. This preparation gives promise of health and keeps it.

A Dangerous Practice
Many children lose their lives every year from tetanus, or lockjaw, caused by stepping on the points of nails thoughtlessly left protruding from boards which are thrown down and left where barefoot children and children with worn thin shoe soles can step on them.

It only takes a few minutes to take the nails out of boards.

Better be safe than sorry.

Bringing Rural Residents Within Closer Reach Of The Urban Dweller

Human necessity and traffic requirements should be the guiding principle in the selection and location of any system of highways, rather than adherence to an artificial system of straight lines. Hon. S. J. Latta declared in his presidential address at the annual convention of the Canadian Good Roads Association held in Victoria recently. To this end, he claimed, the following details should be considered:

The greatest good to the greatest number; most direct route possible for traffic; avoidance of steep curves; advantage of easy grades; minimum construction cost; economy of maintenance; correlation of each road selected and located to other portions of the system; relation of the road as a feeder to railways; drainage facilities; proximity of road material; future requirements; necessity for bridges and culverts; money available for the project proposed.

The advantage of careful scientific planning could not be over estimated. A well-planned road system would help build up manufacturing industries, cheaper cost of raw materials, reduce cost of living by bringing rural residents within closer reach of the urban dweller, help attract settlement and elevate the social life of the community. The type of road to build on any part of a settlement is that which will carry the load which will go over that road at least possible expense. Drainage was important and the greatest engineering skill should be employed in this work.

In location of a system, care must be taken to select mileage capable of being finished by taxpayers concerned, and the same principle must apply in the choice of type.

Road building was a great co-operative enterprise. Taxpayers of any given community should co-operate with each other in the interest of all. Distribution of funds depended on ability to contribute and the benefit derived from the utility provided. Provincial aid to the communities ought to be given on the same basis. It was quite evident, he said, that a basis of population could not fill all requirements for the purpose of co-operation. In like manner it might easily be shown that distribution of federal aid among provinces on a population basis might be in many respects unjust and unequal.

The human element is Canada's greatest asset and its interest must, therefore, be kept at all times in the forefront in any development scheme. Emphasizing the magnitude of the road-building problem, the president stressed the relatively small population spread over an immense area. Upon a family of four persons—less than the average—rests the enormous responsibility of building and maintaining one mile of roadway and upon five average families, the construction and maintenance of a mile of main market highway. Before main roads are built or extended, land areas must be examined, and for those found fit to serve the human element, scientifically planned road systems ought to be devised so that railways, roads and the economic value of land might be made to fit in with each other.

When Time Was Precious

Bell applied for a patent on his telephone, February 14, 1876. The same day, Prof. Edison Gray rushed into the patent office with almost identical the same device.

After years of litigation the national Supreme Court decided in favor of Bell.

Bell got to the patent office a few hours ahead of Gray. The short delay cost Gray what patent attorneys call "the most valuable single patent ever granted."

Being punctual pays. Delay usually means failure. As Napoleon put it, "Every hour of inactivity increases the chance for disaster."—Buffalo Times.

Wild Fruit Crop

Manitoba has a good wild fruit crop in prospect according to Prof. W. T. Bicknell, of the Horticultural Department of the Manitoba Agricultural College. Wild raspberries, plums, Saskatoons, choke cherries, cranberries and other native fruits have blossomed abundantly.

Special wireless sets are being made in America for the use of cowboys while riding on their rounds.

There are no living descendants of Shakespeare, Cowper, Dryden, Swift, Caucer, Pope, Shelley or Byron.

England has a surplus of 2,000,000 women.

W. N. U. 1425

HON. S. J. LATTÄ,
President of the Canadian Good Roads Association

Hong Kong Largest Port in World

Great Commercial Prosperity Result of British Organization

The growth of Hong Kong under British rule is one of the most amazing facts in recent history.

Eighty years ago, when it was ceded to Britain, this small island had a population of 5,000 people, most of whom were pirates. Now, according to the recent census, the population has grown to 616,749, but that figure does not represent the true state of affairs.

When the census was taken the great annual Chinese festival of Ching Ming was being kept. At that festival all dutiful Chinese have to do obeisance at the tombs of their ancestors, and thousands of men return to the mainland to perform this sacred rite.

Then, again, many of the poorer and more ignorant Chinese of Hong Kong feared that the Government had some sinister object in taking the census, and they took elaborate pains to keep their names off the census papers. The result is that the population is not shown at its true figure. Reliable authorities estimate the actual population of Hong Kong at about three-quarters of a million.

Unlike Great Britain and most other countries, Hong Kong has a great excess of males over females. The figures, as revealed by the census, are: Males, 380,273; females, 236,376. As only men go to the mainland for the Ching Ming festival there is no doubt a still greater excess of males over females.

The enormous growth of the population of Hong Kong is, of course, due to good government and the great commercial prosperity of the island is the result of British enterprise and organization. Traders of all nations welcome the security which they now enjoy and which is such a striking contrast to the piracy and insecurity under the old rule.

The island has the finest roads in the Far East, and some of the most beautiful buildings, including magnificent Law Courts, with the same law for Chinese and British, and a university for Chinese, where degrees can be obtained equal in status to those of a home university.

Recently, for the Bachelor of Science degree in engineering, the final papers were sent home to the London University to be marked. They were returned marked "With honors." No mean thing for Chinese students to accomplish!

The area of the colony being limited by the surrounding sea, the value of land is constantly increasing, and in the business quarter of Victoria, the chief city, office rents are as high as in the heart of the City of London.

Hong Kong is not only the largest port in the world, but it is the natural distributing centre for the whole of South China, and as transport facilities are improved on the mainland and trade increases, Hong Kong must grow in importance, wealth and population.

The great need of the colony is cheap coal, and it this becomes available there is no doubt that Hong Kong, the once despised haunt of pirates, will become one of the largest industrial centres in the world. Already about twice as many ships enter and leave the port as enter and leave the great Port of London.

The rise of this land from obscurity to wealth and fame in the course of less than a century is one of the romances of commerce.

No Disguise

Jack.—Did anyone recognize him?
Edith.—Only his wife.

Control Grasshopper Menace

Insect Pest Scare in Districts Where Birds Are Plentiful

"It is almost a certainty that in the southeastern part of Saskatchewan where the hoppers have been most prevalent during the last three years, conditions will not be nearly so bad this year," states M. P. Tullis, Commissioner of Field Crops, Provincial Department of Agriculture. "Field representatives in that territory who have been making surveys report eggs deposits scarce and there is a feeling of optimism among municipal councils and farmers generally. It is hoped that the control measures employed there in the past, and the work of parasites has reduced the numbers of the pest so that the danger period is practically over."

"The first grasshopper mixing stations to open in the province were in the neighborhood of Saskatoon, Dundurn, Haultain and Bradwell which opened up, on May 29, and Delle, Broderick, Tessler, Conquest, Webb, Assiniboia, Vanguard and Neville, and a few other points opened a few days later."

"The present situation in regard to outbreaks of grasshoppers is quite different to what it was at this time last year. Just a year ago, by far the larger quantity of supplies were being used east of the third meridian and ninety per cent. south of the Qu'Appelle Valley. This year nearly all of the materials shipped out from the warehouse have gone west of the third meridian and about equally divided between north of the Qu'Appelle and South Saskatchewan Valleys and south of this line."

"There are practically no hoppers north of township forty. The park and bush areas have been almost wholly free from hoppers each year since the pest appeared in Saskatchewan. This is in all probability due to the presence of much larger numbers of birds that live on insects."

Locusts Destroying Fields of Spain

Great Swarms Cover Railway Line and Stop Train

A large part of Spain, especially Andalusia, La Mancha and Aragon, has been invaded by a plague of locusts like those described in Biblical stories. Great hordes descend on the fields and devour the grain and leaves, transforming the smiling country into a desert within a few hours.

The Government has organized a defense campaign, using paraffin, on which the import duty has been reduced 50 per cent.

Near Lacarolina, in the province of Jaen, a train was stopped by the locusts. Swarms had covered the rails, and on the masses of crushed insects, the wheels of the locomotive merely rolled aimlessly.

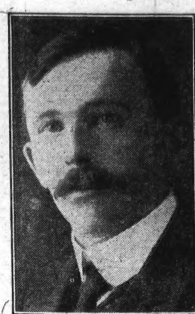

Great Shipping Port

To date 5,000 head of cattle have been shipped out of Montreal to Liverpool and the continent this season. The greater proportion of these animals are from American points. Chicago packing houses are finding it advantageous to ship their product via Montreal to Europe and the business now being handled was once exclusively New York's.

Dredging Schemes in Saskatchewan

Thousands of acres will be reclaimed in Saskatchewan this season when the several dredging schemes under the Department of Highways are carried out. The work which is being undertaken in various parts of the province will cost the Provincial Government about \$50,000.

R. Tretheway, Editor of The Herald, Macgregor, Manitoba.

Rural Schools Crowded

Raising School Age in Saskatchewan Causes Complications

As the result of the new regulations passed at the last session of the Legislature raising the compulsory school age in Saskatchewan to 15 years, many of the school houses in rural districts of the province are crowded to capacity, and a few of them have not sufficient accommodation for all the pupils affected by the new act, according to information which has reached the Department of Education.

"The department has become acquainted recently with a number of cases where insufficient accommodation will be found in the schools for the children who are to attend," A. H. Ball, Deputy Minister, is quoted as stating. "This is true of a number of rural schools, especially."

Mr. Ball stated that the only way out of the difficulty will be for some of the schools to increase the size of classrooms to provide for the jump in attendance.

"In raising the age limit for compulsory education, regard must always be had to this contingency. It was found when the time came to proclaim the adolescent act of Ontario in force there were not school buildings in the province to accommodate a large number of pupils who became liable to attend school under the act, and exactly the same difficulty was found when the Fisher Act in England, came to be put in operation. So Saskatchewan is not alone in her difficulty."

It was intimated that in cases where there is not sufficient school accommodation available rigid enforcement of the act will not be insisted upon as far as the older pupils are concerned, until space can be provided for the classes.

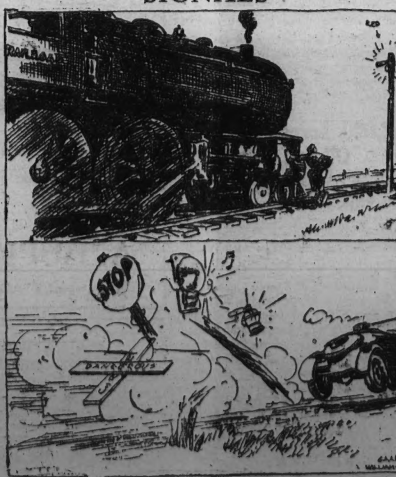

Income Tax Returns

During the last fiscal year the Dominion Government received from income tax returns approximately \$80,000,000, which is a considerable increase over the preceding year, when the returns only amounted to \$50,000,000. The business profits tax, back collections on which were made, brought in an additional \$22,000,000.

Million Dollars for Roads

Over a million dollars worth of contracts for road and street making have been let in Ontario this year, according to official statistics, Quebec coming next with a total of \$416,000. Similar work anticipated to be done during the year in the two provinces amounts to \$2,900,000.

U. S. Scientists Claim To Have Perfected Process For Liquefying Helium

A Little Talk on Thrift

By the President of the American Society for Thrift

This is the time of the year when thousands of our young people are leaving schools and colleges to take up the practical responsibilities of life. They are looking forward with high ambition and a firm determination to make the most of the great years that lie ahead of them.

"Whatever life may hold for the individual during the next fifty years, it may be accepted as a matter of certainty that life during this era will be more interesting than ever before. With the rapid progress now being made in many branches of science, one cannot, by the wildest stretch of imagination, picture what wonders will be seen and experienced by those who are alive fifty years hence.

But the fundamentals of human progress are as changeless as the stars, and those who go the furthest in life's accomplishments will do so because of their adherence to those elements of success chief among which is the practice of broad constructive thrift."

This does not mean alone economy matters, but it means in a word the elimination of all forms of waste. One of the penalties of inexperience in practical matters is one's failure to appreciate the value of little things, and thrift is essentially a conservation of the so-called unimportant things.

Those who are thrifty are systematic, efficient and progressive. They know how to stop up the little leaks.

The elimination of idle moments means more work done, just as the saving of a few dollars here and there means a substantial accumulation.

Be willing to sacrifice small pleasures for the good of your career. Work systematically toward the one fixed purpose you have in mind. Do not try to arrive at the goal of your ambition too soon. Learn the value of patience.

There are no lessons which life can teach that are of more practical value than these, and we hope that among the young men and young women who are going out into the world of experience at this time many will be imbued with the spirit of true thrift for otherwise they can never hope to reach that high plane in life which is their heart's dream today.

Above Petty Meanness

British Always Show Kindness Even to Their Enemies

It seems, sometimes, as if Britain were constantly obeying the divine command: "Love your enemies." She answers slander with a smile and refuses to take the onslaughts of venomous critics seriously. Only the other day we read a warm appreciation of the Freeman, of New York, a vehement backbiter of Britain, from the pen of the great London editor, Sir W. Robertson Nicoll. Sir Robertson said he had been reading the Freeman, which "roasts" and ridicules Britannia in every issue, and had found some splendid literary comments in its pages. He overlooked the trashy insults to his country, and, turning to something else, found an article or two that intrigued his intellect and touched his heart. For the sake of these, he recommended the Freeman to his friends. This is the sort of Briton that Mr. Hearst will meet in the world's metropolis. When he returns, let us hope, he will feel more than ever that throwing mud at such a friendly people is not only bad manners and poor policy, but sheer waste of time and effort.—Chicago British-American.

May Move Paris Observatory

The vibrations of gay Paris are putting the world's greatest timepiece out of commission. Thus the Paris Observatory, which daily sends the time throughout the world by wire, and is now owing to vibrations incapable of calculating time more closely than .004 or .005 of a second. This is not exact enough, and M. Ballaud, Director of the Observatory, presented to the Academy of Sciences a report on conditions, and suggested that the observatory be removed from Paris.

Successful Tree Planting

Giving a brief history of tree planting in the prairies and the successful results achieved by the free distribution method of the Dominion Government, a bulletin issued by the Forestry Branch states that at least 70 per cent of all free plantations in Western Canada have been successful.

A typesetting machine invented in 1872 contained 35 thousand parts.

The coldest spot in the world has been found. By comparison, the North Pole is warmer than the tropics. It is so much colder than any other spot in the universe that comparisons are almost impossible. To be exact, it is 515 degrees Fahrenheit below zero. For instance, the known temperature near the North Pole varies from 30 to 60 degrees below zero. At the highest altitude ever reached in an airplane, the temperature hovered around 60 degrees below zero. This was nearly seven miles up.

This remarkable spot is in Washington. It is the cryogenic laboratory of the Bureau of Mines, Department of Interior, where, for more than two years, scientists have been working in an effort to liquefy helium gas, purify it and make it 100 per cent. efficient in the lift of giant dirigibles.

And after numerous failures success finally is in sight. So sure are the scientists of this that they expect to be able to announce before the end of the year that what has been assumed to be impossible has been accomplished and that helium gas has been liquefied and absolutely isolated from traces of any foreign gases.

When the process is perfected, it will be of inestimable value to science, particularly to the navigation of the air by the huge ships which will cross the Atlantic and Pacific oceans. It will make accidents, such as that which recently happened the airship Roma, impossible, for the gas is non-inflammable and only lacks lifting power to the extent that it has been impossible to free it of other gases.

The research work is also calculated to reduce the cost of producing helium, which to date has been so expensive and prohibitive that airships have been only partially inflated with it.

Walking and Riding

Probably No Form of Exercise Will Take the Place of Walking

The doctors, who are complaining of the decline of walking are thinking of no doubt of the effect upon health. Considered as an exercise for the promotion of health there is probably nothing to take the place of walking. The automobile has its uses, too, as health-giving agency. It does afford an opportunity for "taking the air," but unfortunately the air to which it brings its devotees is usually so charged with the dust of the roads that it is of questionable value from the point of view of health. But the art or exercise of walking, has many claims to consideration from the point of view of pleasure. It yields a kind of pleasure to be found in no other way. The blue sky, the green fields and the open road—it is a vision to stir the blood of a lover of outdoors, for those who take delight in the simple and beautiful things which nature provides so lavishly for all who are capable of enjoying them, there is no form of motion to take the place of walking.—From the Woodstock Sentinel-Review.

Good Work of G.W.V.A.

Veteran Receives Money Due Him as Result of Effect of His Organization

S. G. Armstrong, of Lockwood, Sask. has received a cheque for \$40 as a result of representations made on his behalf by the Saskatchewan Command of the Great War Veterans' Association.

He deposited money to the credit of the S.S.R. in an English Bank as he intended to take up land on his return to Canada from overseas. In July, 1921, the money was transferred to this country at his request and deposited at Lockwood. In the process of transference he suffered a loss owing to the depreciation in the rate of exchange between the time he asked for the transfer and when it was actually effected. In August, 1921, he brought the matter to the attention of the G.W.V.A. and after nearly nine months' of correspondence, his claim has now been satisfactorily settled.

Alberta Potatoes Free from Disease

There will be a very large demand for Alberta grown seed potatoes for the Central and Southern States in the near future, according to C. O. Fitch, editor of the Potato magazine published at Ames, Iowa. He points out that the Alberta product of seed potato is particularly free from disease.

Coal grates should be shaken in the morning and not at night.

The nickname Uncle Sam was first used at Troy, New York, in 1812.

Gas Company Offers to Supply Viking With Gas

Is Viking at last going to get gas? Hopes of it were again aroused last Friday when an offer was made to the Village Council by the Viking Gas Co. Ltd., a subsidiary company of the Northern Alberta Gas Development Co. to supply the town with gas for domestic purposes at 50 cents per 1,000 cubic feet.

The company is asking the Village for a ten year franchise, the maximum rate to be 50 cents, with the right to appeal to the Public Utilities Board at any time should the ratepayers feel that the rate is excessive.

The Village Council called a meeting of the ratepayers at ten o'clock Friday morning when the offer was discussed. Mr. Purvis, village solicitor, was chosen to occupy the chair. He explained the nature of the meeting and read the proposed agreement between the village and the gas company, clause by clause, after which he called upon Mr. A. S. Matheson, solicitor for the gas company, to state more fully the proposition.

Mr. Matheson was very frank in his statements and said that he was here with a bona-fide offer and that the company was ready and willing to put gas in Viking before next Christmas if the ratepayers saw fit to sign the proposed agreement. He also explained that the offer was also in the

nature of a demonstration of the gas field here, and while the piping of gas into Viking alone could hardly be a money making proposition, yet it would serve to show the advantages of natural gas and show the world that there was plenty of gas here.

After some discussion, the following resolution was passed by the meeting: Moved by Mr. Bassett, seconded by Mr. R. Sparling: "That we the ratepayers approve of the Council in accepting the offer made by the Viking Gas Co. to supply the Village of Viking with natural gas, and pledge their support to the project."

After the meeting several minor changes in the contract were asked for by the Council before signing same. These have been referred to the gas company, and if they are agreed to, they will be returned here for final completion.

The company states it will cost in the neighborhood of \$30,000.00 to construct the pipe line and lay the gas mains. This will mean considerable work for men and teams in the community, such as ditching and hauling etc.

We do not care to gush too much about this offer until we see actual work commenced.

Messrs. Hiperson and Hamilton how-
ever, proved themselves to be genuine
sports undaunted even by a rain
storm. The picnic had been arranged
for June 23rd and when Avonglen ar-
ranges for anything it goes regard-
less of the weather. From the rooting
at the ball game Orbindale vs. Au-
tumn Leaf one would know the boys
have the support of their friends. Au-
tumn Leaf was handicapped some-
what when account of the rain some
of their players did not turn out mak-
ing it necessary to get volunteers
from the crowd. The purse went to
Orbindale. The races were keenly con-
tested. The crowd was not large but
all seemed to thoroughly enjoy the
day. At 5 o'clock a real picnic lunch
was served. G. Hiperson is to be com-
mended for the handling of the re-
freshments, he had a busy day. The
management wishes to thank the busi-
ness men of Irma for the many prizes
for the contests.

Easy Now to Rid Your Farm of Gophers

Wonderful Discovery by Noted Scien-
tist Kills Every Gopher Within
a Week's Time—Not a Poison.

Gophers cost farmers over two hun-
dred millions of dollars a year, thru
the destruction of crops and damage
to land. Farmers need no longer suf-
fer this loss because they can now kill
off all the gophers on their farm in
less than a week's time. This is possi-
ble through the remarkable discovery
of E. R. Alexander, a chemist who has
perfected a virus which kills gophers
and rats as though by magic. This
product is not a poison—it can be eaten
by human beings or any animal
on the farm as safely as their regu-
lar food, but means quick, sure death,
to gophers.

This wonderful gopher virus, which
is known as Alexander Gopher Killer,
is merely mixed with bread or meat
scraps and placed where gophers, rats
and mice can get at it. Within a few
hours after a gopher has eaten Alex-
ander Gopher-Killer he gets a high
fever and suffers a terrible thirst. He
leaves his pits and nesting holes and
goes to the open field in search of
pure air and running water.

It is a scientific fact that one gop-
her affects others and soon the whole
colony dies. And though this virus is
absolutely deadly to gophers—chick-
ens, hogs, cattle or any farm animal
can eat it and not be affected at all.

So confident is Mr. Alexander that
Alexander Gopher-Killer will kill ev-
ery gopher on your farm in less than
a week's time that he offers to send,
as an introductory offer, a regular
\$4.00 tube for only \$2.00. Give it ac-
cording to directions, and if at the
end of a week's time you are able to
discover any gophers, rats or mice on
your farm your money will be re-
funded. A big Toronto bank guaran-
tees that Mr. Alexander is reliable and
will do as he says.

Just send money order, check or
currency for \$2.00 to E. R. Alexander,
Alexander Laboratories, 5004 Termi-
nal, Toronto, Ontario, and the tube will
be mailed at once on the guarantee
that if not, absolutely satisfactory
your money will be returned without
questions. Write today and stop your
gopher losses now. 9-13-c

I AM THE OIL LEASE

I have created more rich men and
have made more millionaires than any
other single agency. I am the advance
agent of oil prosperity. I rise early
in the morning and present an open
field where men may become million-
aires. In communities where people
have beckoned to my call, the neigh-
borhoods are cluttered up with million-
aires.

I am an oil lease.
Without me, the great oil corpora-
tion could not turn a hand, and all
industry would halt. I am a modest
element in modern business, yet I am
the foundation on which the world's
greatest industry is built.

I am the oil lease.
I have made a hundred millionaires
in Oklahoma. I have made a thousand
millionaires in Texas and am contin-
uing to make more every day. I was
asleep in both Oklahoma and Texas,
but finally I was aroused by courage-
ous men who have converted lands in-
to expanse of liquid gold that is valued
into the billions.

I am the oil lease.
When I am dormant I cause little
excitement, but when I rise men come
along and get busy around me. I take
on new life and new value. I am the
embryo element which may at one
stroke turn poverty into great wealth.

I am an oil lease.
Those who take an interest in me
and observe caution, yet exercise su-
preme courage, will achieve riches. I
do not disappoint those who put faith
in me. There are more latent possibili-
ties in me than in any other inanimate
object in the world. I am on the job
every day in the year. If I get the
right kind of co-operation, I will agree
to turn out a millionaire each time
the sun sets in the golden west.

I am an oil lease.—Texas Oil Ledger

I. O. O. F. MEMBERS VISIT

Monday night the officers of Irma
Lodge I. O. O. F. motored to Wain-
wright for joint installation.
District Deputy E. Ripley performed
the duty of installing the officers for
the Irma and Wainwright Lodges. Af-
ter the installation Wainwright
Lodge furnished the refreshments for
their members and the visiting breth-
ren.

BATTLE VIEW U. F. A. PICNIC

The U. F. A. of Battle View will
hold a picnic at Battle View school
house on Tuesday afternoon, July 25.
Everybody is invited, a good time as-
sured.

SILVER LANE

Frank and Roy Reber and Fred
West went to Edmonton Sunday in the
Reber automobile.

The Trail Rangers met at Mr. Horns
home Saturday afternoon. Two of the
boys, Vernon Weier and Arthur Hart
will attend the camp at Clear Lake,
July 12 - 20.

Wednesday of last week was repair
day at the school house. New posts
were set for the fence and the wire
tightened, and dirt was graded in
about the foundation of the building.
A coat of sod on top of this dirt
prevented blowing off again would be
a good investment.

Miss Violet Bronson was the guest
of Mr. and Mrs. J. A. Bell from Tues-
day to Saturday of last week.
Arthur Goodrich spent Sunday visit-
ing with Art Long near Irma.

Letters to Editor.

To the Editor of The Irma Times:
As the Secretary-Treasurer of the
Irma Agricultural Society I would
like to explain my position regarding
the printing of prize winners at our
fall fair. In the first place it is not
part of the Secretary's contract to
spend time in making out a list of the
winners, and secondly when they were
printed heretofore there was such a
number of complaints as to mistakes
that the Secretary decided it was bet-
ter to leave it out, as after all the
Judges books are the only authentic
source for this information, which du-
ly comes out in the fall when cheques
are paid.

Signed J. W. Milburn, Sec'y-Treas.

PHILLIPS SPORTS DAY AT LAKE OLIVIA JULY 19TH

The Phillips football team are put-
ting on a sports day and picnic at
Lake Olivia on Wednesday, July 19th.
Program starts at 1:30 P.M. A ball
game between Phillips and Camp Lake
will start things going, next a football
game between the North and South

CAN THE DEAF BE MADE TO HEAR?

This question can be answered both ways. If the deafness is due to Catarrh, success is general if the sufferer persists in the use of Catarrhine, and thereby drives Catarrh out of the system. Penetrating through the passages of the ear, the soothing vapor of Catarrhine relieves the inflammation, destroys the seeds of Catarrh and thereby allows nature to reassert herself. For Catarrhine Deafness, pain over the eyes, swelling nostrils and other symptoms associated with Catarrh use Catarrhine. You'll be more than pleased with the quick improvement in your condition. Two months' treatment. One Dollar sent everywhere, or the Catarrhine Co., Montreal.

MY CANADA

BY

with the Author

(Continued)

After we had been introduced to the shopkeeper, his wife—who is also postmistress—the clerk, and two farmers and their wives, Mrs. Mills gave her order, while Mary and I listened respectfully to a heated discussion which had for its subject the various virtues and vices of the Roblin Government.

"I tell you what," said one man, "the Agricultural College is the only good thing the Conservatives ever gave us—don't talk telephones to me!"

This reminded me that I had left Winnipeg without seeing the far-famed Agricultural College.

Mrs. Mills had now finished her purchasing, and after she had asked for her mail and left word for the Fishes' man to call for this evening, we proceeded on our way.

"Another of them machinery duns," remarked our guide in a resigned tone of voice as she sorted out her letters. "An' three letters for Mr. Hartford—two of them looks like they might be from ladies. Queer, an' I, that he never got married, an' him such a big-looking man."

"I hope you will pardon me if I am rude, Mrs. Mills," said I, "but would you mind telling me what a 'machinery dun' is? I do not think that I have ever heard the phrase until now."

"A machinery dun," she began, and I knew instantly that I had blundered upon an unpleasant subject, is a written request to put up or shut up. Then darned drummers come around in the spring an' sells the farmers a whole caboodle of machinery they could just as well do without. An' he takes notes due at harvest time. Well, perhaps when fall comes the crop has been bad or you can't get cars to ship your grain, an' then the firm begins to write polite letters threatening to

seize everything you've got if you don't pay up immediate. If we ever get votes for women in this country, I'll bet my bottom dollar that there'll be a law made so that men can't buy machinery without their wives agree to it. It's a different story if a woman wants something to make her work easier."

"I beg your pardon," I said as soon as she paused for breath. "I should not have mentioned the subject had I known that it was one on which you felt so strongly."

"Oh, it don't bother me particular," she replied, "except that I do hate to see such make such fools of themselves, an' then their wives an' kids have got to suffer for it. You'll be wondering how I happened to get a darning letter, so I'll just tell you how it come about. I like to have somebody to talk to, but these Elba women are such awful gossips that I hate to say a word to them. Some times I get so full up that I feel like to bust right out into high-steeriks."

"You'd probably never guess it, but I was only married three years ago. Reginald an' Percival ain't my children at all, though I'm just as fond of the poor kids as if they were."

"About five years ago Pa died back east, an' being as I had lived on the farm for the last six years, I was so sick of it that I just sold every stick an' come west for a visit to my brother in Winnipeg, an' later on I come out here to see John an' Arabella Fiske."

"Mr. Mills had a farm in these parts then, an' him and me got up with a broke collar-bone, Arabella used to go over pretty often an' red up the house for him. He was a real interesting

man to talk to—English, an' they do say that he has some letters to his name—but that shuffles! I used to be so sorry for those poor motherless kids that I'd like to have cried—they were just growing up like young Indians, an' when he got better an' asked me would I marry him, I said yes. The folks around here says that an' Ontario old maid will marry anything that calls itself a man, but, as true as I live, it weren't to hear myself called Miss that I married Mr. Mills, but because I'm that tenderhearted I can't bear to see them handless men trying to fend for themselves an' bring up kids."

"Well, things went fine for a while. Mr. Mills was always a perfect gentleman, I'll say that for him. But one day there come a letter from the American Implement Company saying as how they'd heard that Mr. Mills had married a woman with money, an' he'd do anything towards paying up his debts for machinery—enough to run three farms, there was. An' if we didn't pay up at once they'd take back the goods an' foreclose the mortgage on the farm. An' that man had told me before ever we was married that he wouldn't do no such thing, but he had a clear title to his farm."

"That fixed me. I wrote back to the company an' paid for the buggy we was using, but I told them that I all I would do, an' that there wasn't no way of getting out of it, except Mills himself, an' they could have him an' welcome. An' then me an' Mr. Mills had that fight call it, an' he wouldn't talk, an' the result was that one day he cleared out an' went to Winnipeg, an' I ain't seen nor heard of him since. The firm foreclosed the mortgage an' of course we had to get off the farm, so I bought this here boarding place an' with the help of the Lord an' plenty of elbow grease I've managed to keep things going an' them two poor kids is going to have their chance."

There were tears in the good woman's eyes as she finished. I shall never laugh at her grammar again. But the mixture of tragedy and comedy, philosophy and common-sense, is rather disconcerting. "You'll both be thinking that I'm an awful talker," she said after a short pause. "But I've got one thing more to say, Miss Eliot, an' you too, Miss Arnold. If ever you have a notion of getting married to a man, just go to the Land Titles Office an' have a search made to see if his property is clear. It'll only cost you a dollar or so, an' it's worth it."

After we had returned to the "Palace" I wrote letters until tea-time, while Mary went in search of the twins, found them—digging helminths in the back garden, up—and made them her willing slaves for life. Mary "has a way with her" that makes me break the Tenth Commandment. While we were having tea, Mr. Hartford told us that it was his custom to hold Evensong every evening. This custom scandalizes the good people of Elba, who consider it a weak imitation of the forms and ceremonies of the Roman Catholic Church. (It has just occurred to me that, so far as my feminine mind can grasp the situation, the average Canadian looks upon the Roman Catholic Church as a political party rather than as a religious body.) So when tea was over Mary and I, at Mary's suggestion, helped Mrs. Mills to wash the dishes and then we took her to church with us.

Mr. Hartford tells us that he has not seen a nicer village church in Manitoba than St. George's, so perhaps a description of it will not be out of place. To begin with, it is very tiny—a hundred people would fill it to overflowing, I am sure. To a height of four or five feet the walls are of stone, and above that they are covered with shingles stained a warm brown color. The green roof has a low eave and the eaves project, the latter feature giving the building a homely, settled appearance—painfully lacking in the usual Canadian church architecture. Most Canadian roofs seem to be half a size smaller than the buildings they cover. The inside of the church is very plain, but all the furnishings are of good quality and in good taste. I cannot become reconciled to the dear little glass windows, but there is something to be said in their favour when the evening sunlight floods all the building.

I slept without rocking that night, and dreamed that I was in our own church at home. Mr. Hartford was reading the lessons; while Father sat in the front pew and beamed approval. Arthur, meanwhile, was engaged in the laudable occupation of carving our initials—his and mine—on the

YOU HAVE heard about the little bird house that Sally and her brother had built and placed up in a tree for Mr. and Mrs. Wren to nest in, and you also heard how Mr. and Mrs. Wren had quarreled over a certain straw in the nest, with the result that Mr. Wren, who was getting the worst of the argument, had flown away. But he did not stay away. Oh, no! He was much too interested in that new home of theirs. So back he flew, very cheerful in spirit and bearing in his bill a long, soft, plummy grass as a peace offering.

Mrs. Wren was ever so glad to see him back—though she made no remark about it, but, very gently accepting the grass, she carefully wore it into the front of the nest she was busily working on.

Sally and her brother watched from a short distance and wished that the Wren's house were not quite so far away from the ground, for they were more curious, and they fairly longed to be able to look into the tiny front door and see what was going on.

A few days later they noticed that Mrs. Wren remained most of the time in the house and that Mr. Wren always flew home carrying large flies and moths in his bill.

"That means Mrs. Wren is sitting on her eggs and doesn't dare leave them, and he is bringing her insects for food," Sally whispered to her brother. About five weeks later when the children again were following near the nest by their anxious parents and given their first lessons in flying.

That evening the two children told their father what they had seen, and he was very interested.

"Have you ever heard the story," he asked, "of how the Wren got the best of the Eagle?"

Sally and her brother shook their heads; so he continued: "Once upon a time there was a contest among all the birds of the air to determine which could fly the highest. It seems that the highest flyer would be chosen King of Birds. Of course none of them was the largest and strongest. The Eagle seemed to be successful, as he was the largest and strongest. Just as the other birds were about to call him their King the clear, sweet song of a Wren was distinctly heard—and it was far higher than the Eagle. A little Wren had perched unnoticed on the Eagle's back and been carried up into the sky until the exhausted Eagle had flown his limit, when the Wren suddenly spread his tiny wings and continued up—up—up—"

"And was he chosen King instead of the Eagle?" asked the children.

"No," replied their father, "because he had cheated, and every one has to win a contest by fair and square means only."

"Are there many different kinds of Wrens?" Sally then asked her father.

"Yes, quite a few. The 'Winter Wren' is the smallest, and oh, how he loves to bathe! He is often seen splashing in icy water in midwinter. The 'Carolina Wren' are the largest of the family. These are faithful to the same mate until parted by death. They are odd in their characteristics of burrowing into the ground and building their nests among red cedar and tall water plants, and their nests are deep, swinging, baglike pouches, very much like the Oriole's, except that the opening is on the side."

Copyright, 1922.

channel rail, and I was in agony lest Mr. Hartford should discover what he was doing.

Mary, whose train leaves in an hour, is hovering around, and I think from her expression that she has a few last words of advice to administer.

No, I do not wish that I were going back to Winnipeg with her! (To be continued)

Liver Pains
Pains under the shoulder blades tell of liver derangements. Other indications are sallow complexion, indigestion, constipation, biliousness and bilious headaches.

The quickest way to arouse the liver's healthful action is by use of Dr. Chase's Kidney-Liver Pills. Continued use will insure lasting relief, correct the whole digestive system and purify the blood.

Mrs. Wm. Barten, Hanover, Ont., writes:

"For some time I suffered from liver trouble. There was a hard, bearing-down feeling in my back which I could not get rid of. Some one advised me to try Dr. Chase's Kidney-Liver Pills. I did so, and found them excellent. The dragging feeling in my back disappeared and I felt much benefited generally. I have great confidence in Dr. Chase's Kidney-Liver Pills, and always keep them on hand for general use."

Dr. Chase's Kidney-Liver Pills, one pill a dose, 25c a box, all dealers, or Edmondson, Bates & Co., Limited, Toronto.

Couldn't Be Happy
"Your wife says she is entirely happy," said the spiritualistic medium.

"I don't see how that can be," replied the man.

"She is in Heaven," replied the medium. "There she would naturally be happy."

"I don't think so," replied the man stubbornly. "I don't see how she could ever be entirely happy without me around, to find fault with."—Detroit Free Press.

As a health builder—Royal Yeast is gaining in popularity every day. It is a food—not a medicine. It supplies the vitamins which the diet may lack. Royal Yeast is highly beneficial in cases where the system seems "run down". Royal Yeast is the richest known source of vitamins, and when taken into the system acts as a corrective agent. Royal Yeast Cakes are recommended for their purity and wholesomeness. It is the purest, the most convenient and economical yeast on the market.

Two to four Royal Yeast Cakes a day will work wonders. A full day's supply can easily be prepared at one time by using one glass lukewarm water and teaspoon sugar to each yeast cake. Allow to stand over night in moderately warm room. In the morning stir well and pour off liquid. Place in refrigerator or other cool place and drink at intervals as desired throughout the day.

Send name and address for free booklet "Royal Yeast Cakes for Better Health."

Liner Delayed to Save Life The Oldest Thing Living

Atlantic Liner Goes 150 Miles Out of its Course to Render Assistance

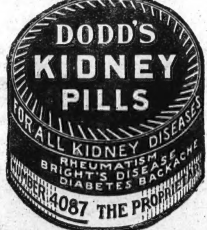

The value that we set on human life today has been dramatically illustrated by an incident on the Atlantic Ocean.

An explosion in the engine room of a freight ship caused terrible injuries to the second engineer, a young man named O'Neal. There was no doctor on board, so the captain sent out wireless calls for assistance.

Seven ships replied. In six cases doctors told the captain what treatment would be likely to give the best results.

But one passenger liner did more than this; it was put 150 miles out of its course and sent a lifeboat with the ship's doctor in it, who attended to the patient and then had him transferred to his ship. When the liner reached England he was comfortable and on the way to recovery.

Canadian Cattle for Britain
About 32,000 live cattle were imported into the United Kingdom from Canada for food in 1921, according to a statement made by Sir Arthur Griffith-Boscawen, Minister of Agriculture. In the first four months of this year 2,193 cattle were imported, whilst in 1919 and 1920 no importations took place.

That Luscious Raisin Toast!

A NEW delicious breakfast bread. Full-fruited raisin toast! A new delight for the entire family.

Made with big, plump, tender, seeded raisins—Sun-Maid brand.

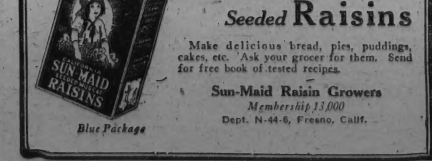

The raisin flavor permeates each slice. You can get such bread from any grocer or bake shop if you insist. No need to bake at home.

Once try it and you'll always have this kind. You'll serve it at least twice a week.

Fine food for business men and children due to the energizing nutriment and the iron of this famous, healthful fruit.

Make dainty bread pudding with leftover slices. No need to waste a crumb.

Order now for tomorrow's breakfast. Be sure to say you want "one of those full-fruited raisin loaves."

Make delicious bread, pies, puddings, cakes, etc. Ask your grocer for them. Send for free book of tested recipes.

"What's wrong with you?" sang out the enamelled ware kettle to a brilliant, silvery sauce pan hanging on a hook behind the stove. "I haven't seen you on the stove for weeks. Anything wrong?"

"Everything's wrong," sighed the brilliant sauce pan. "Mistress says she's tired of having to scour and rub and polish me every time she uses me. I guess I'm too hard to keep clean."

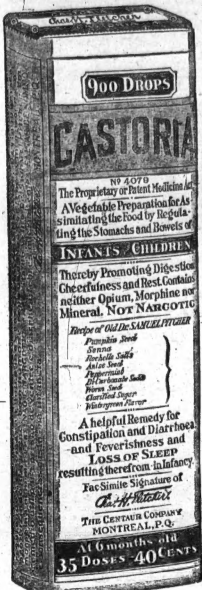

"My little nephew, SMP Sauce Pan, seems to have your job now," said the kettle.

"Yes," said the silvery sauce pan sadly, "Mistress says she prefers SMP Enamelled Ware, because she can clean it in a jiffy, even after the greatest frying or boiling. I guess I'm on the shelf, all right!"

See that every enamelled ware kitchen utensil you buy bears the well-known SMP trade-mark.

Children Cry For *Fletcher's* CASTORIA

Special Care of Baby.

That Baby should have a bed of its own all are agreed. Yet it is more reasonable for an infant to sleep with grown-ups than to use a man's medicine in an attempt to regulate the delicate organism of that same infant. Either practice is to be shunned. Neither would be tolerated by specialists in children's diseases.

Your Physician will tell you that Baby's medicine must be prepared with even greater care than Baby's food. A Baby's stomach when in good health is too often disarranged by improper food. Could you for a moment, then, think of giving to your ailing child anything but a medicine especially prepared for Infants and Children? Don't be deceived.

Make a mental note of this—It is important. Mothers, that you should remember that to function well, the digestive organs of your Baby must receive special care. No Baby is so abnormal that the desired results may be had from the use of medicines primarily prepared for grown-ups.

MOTHERS SHOULD READ THE BOOKLET THAT IS AROUND EVERY BOTTLE OF FLETCHER'S CASTORIA

WORLD HAPPENINGS BRIEFLY TOLD

Fresh apples are now being shipped from the North Pacific ports direct to Europe by way of the Panama Canal.

At a meeting of directors of the Canadian Pacific Railway, W. N. Tilley, K.C., Toronto, was elected to fill the vacancy on the board caused by the death of Sir John Eaton.

The bill amending the Vancouver Harbor Commissioners' Act went through the committee stage in the House June 12. Hon. Ernest Lapointe said the purpose of the bill was to bring Vancouver into line with all the other ports of Canada.

An English syndicate headed by the Duke of Argyll has bought the Botton Willow Ranch, comprising 154,000 acres in San Joaquin Valley, Cal., for a consideration of twelve million dollars, according to advices published by the Los Angeles Times.

Captain A. W. Stevens, aerial photographer, at McCook Field, Dayton, Ohio, broke the world's parachute jumping record when he descended 24,296 feet. He landed at Jamestown, approximately 25 miles from where he left the plane. The descent took thirty minutes.

Third reading was given in the House to a bill to amend the Canada Shipping Act, so as to add to the list of vessels exempt from pilotage dues. Under the bill the government in council is authorized to exempt from pilotage dues ships of war and hospital ships belonging to specified nations. The idea is to grant the privilege to such nations as grant it to British warships.

Super-U-Boat Designed

German Inventor Has Submitted Plans to United States

A 7,000-ton armored submarine cruiser, with an action radius of 23,000 miles, is the battleship of the future, according to its designer, Professor Oswald Flamm, who constructed the commercial submarine, the Deutschland. He has submitted plans of his invention to the United States, Britain and Japan, as Germany is forbidden to build new war craft for decades to come.

The projected super-submarine can make four round trips between the North Sea and the United States without touching any port. It carries two 8-inch and four 3½ inch guns, with 5,000 rounds of ammunition and eight torpedoes tubes, with forty torpedoes. In explaining its plans, Professor Flamm declared that, in case of a war with the United States, Japan, with several of these submarines, could cut off the Pacific from the Atlantic fleet by destroying the entrance to the Panama Canal.

"I would rather," said, "see my invention to the United States than to any other country, but so far Japan and Britain have been pressing me hard to turn over the complete plans, while the United States has shown only mild interest."

Why Germany Hates France

Because French People Insist on Reparation Says Poincare

"Surely we desire the resumption of normal relations with Germany," says M. Poincare, "but we cannot ignore the ferment of hatred which is brewing against France in Germany." No visitor to Germany could possibly ignore it, and it is well that the fact is plainly realized in Paris.

This hatred developed after the armistice. Before that German war hatred was centred on England, and to a lesser degree on America. But as time has gone on, these hatreds have virtually disappeared. On the other hand, toward France there was, so American observers report, no hatred at the time of the armistice.

Why has this reversal taken place? Fundamentally, no doubt, because Great Britain and America, soon lost interest in enforcing the reparation clauses, while France adhered firmly to the treaty. Partly, no doubt, because Germany, in her humiliation, had to have a scapegoat—New York World.

A Great Gold Hoard

The greatest amount of gold ever assembled in one place lies in a Government building in New York. Its value is fifteen hundred million dollars, and it is said to represent one-fifth of all the gold that has been produced since the beginning of civilization.

In Japan books are bound with the edges in, the readers begin at the back and go forward, and they read vertically instead of horizontally.

The man who boasts of being a cynic is usually more foolish than dangerous.

Minard's Liniment used by Physicians

W. N. U. 1425

A Suit That Is New.

The ever popular box coat is distinguished this season by the flaring or bell sleeve—as in this attractive suit made of midnight blue wool and trimmed with diamonds of mauve ribbon attached with steel beads. An hat of imported milan completes a costume that is due to cheer the heart of the most fussy little lady.

You May Be Ill To-night Have You a Remedy?

It may be a disordered stomach, perhaps cramps or acute indigestion. If you have no remedy handy, you are bound to suffer. Twenty drops of Nervine in sweetened water will ease the pain and enable you to get a good night's sleep. Whether it is Neuralgia, Sick Headache, or some other minor ache or pain, Nervine can be used internally or externally and will be found a true friend for every family. Large 25c bottles sold everywhere.

Shifting the Blame

"Your advertisement describes this as all wool. It is nearly all cotton." "Yes, that's the worst of the newspapers. You can hardly believe a word they say."

Nervous Breakdown COULDN'T SLEEP NIGHTS

To those on the verge of a nervous breakdown the following symptoms present themselves: nervous headaches, a feeling of depression, fitful disturbed, restless and unrefreshing sleep, often troubled with frightful dreams, avoidance of crowded places, dread of being alone, horror of society, etc.

When the nerves become affected in this way the heart generally becomes affected too, and on the first signs of any weakness of the heart or nerves, flagging energy or physical breakdown do not wait until your case becomes hopeless, but get a remedy that will at once quieten the nerves, strengthen the heart and build up the entire system.

This you will find in

MILBURN'S HEART AND NERVE PILLS

Mrs. M. D. Dangand, Young's Cove Road, N.B., writes: "I was bothered very much with my heart and nerves; had nervous headaches and dizziness, could not sleep at nights, and my appetite was all gone. I was on a nervous breakdown when a neighbor told me of Milburn's Heart and Nerve Pills. This I did, and before I had the second box used I was better and would advise anyone who has nerve trouble to take them."

Price, 50c a box at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

If the whole earth was reduced to a level tablet its height would be 920 feet above sea level.

Lightning Harmless to Airplane

Air Pilot Escapes Injury When He Meets Current at 100 Miles an Hour

Captain E. D. Herne, a cross-channel air pilot, has had the extraordinary experience of striking the path of a flash of lightning while in flight at a speed of 100 miles an hour.

Captain Herne recently made a record double trip between London and Paris in a single flying day. While passing along the airway to Paris he observed heavy thunder clouds above the channel. He was skirting these when he suddenly saw two or three vivid flashes of lightning near the machine. The aeroplane seemed to shudder and hesitate, then, recovering itself rapidly, continued smoothly in flight.

It has often been a matter of speculation what would happen should an aeroplane in flight come in the path of a flash of lightning. Some experts declared—and Captain Herne's venture offers the first confirmation of their argument—that the lightning would flow around the machine and down its wireless aerial and continue earthward without damaging the craft.

Way to Reduce Armaments

The way to reduce armaments in Europe is to reduce the suspicions and fears that cause armies to be maintained. But that cannot be done until the light of common sense breaks in Russia; until the numerous boundary questions that blur the map of Europe are out of the way; until Greece, Italy, France and Great Britain are satisfied with the state of affairs in the Near East, and until France is convinced that Germany will carry out all of the terms of the treaty of Versailles.—Detroit Free Press.

O. McPherson, Furniture Dealer, Undertaker, Armstrong, B.G. Yarmouth, N.S.

Dear Sir:—Since the start of baseball season we have been hindered with sore muscles, sprained ankles, etc. but just as soon as we started using Minard's Liniment our troubles ended. Every baseball player should keep a bottle of your liniment handy.

Yours truly,
W. E. McPherson,
Secretary of Armstrong High School Baseball Team.

Educating Soldiers' Children

Children of Ex-Servicemen in Saskatchewan Receiving Education Through Financial Assistance

A total of 3,497 children of ex-servicemen in Saskatchewan out of a possible 3,773 are receiving their education through financial assistance provided by the province. An act was passed in May, 1920, designed to enable children of deceased or disabled soldiers who, but for his provision might be compelled to relinquish their school career, to pursue their studies in the higher educational establishments. So successful has this work proven that two other provinces of the Dominion are now contemplating an act similar to that of Saskatchewan.

No such city as Troy, or people as Trojans, were known in historic times.

Ask for Minard's and take no other

The world's consumption of sugar is estimated at between 14,000,000 and 15,000,000 tons a year.

Hall's Catarrh Medicine

Those who are in a "run down" condition will notice that Catarrh bothers them much more than when they are in good health. This fact proves that while Catarrh is a local disease, it is greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE is a Tonic and acts through the blood upon the mucous surfaces of the body, thus reducing the inflammation and exciting Nature in restoring normal conditions.

All Druggists. Circulars free.

18,222 French Prisoners Died

A total of 18,222 French war prisoners died in Germany during the war. It was announced officially by War Minister Maglout.

DAUGHTER WAS WEAK AND NERVOUS

Mother Gave Her Lydia E. Pinkham's Vegetable Compound with Happy Results

Cobourg, Ontario.—"Lydia E. Pinkham's Vegetable Compound was recommended to me for my daughter. She had trouble every month which left her in a weak and nervous condition with weak back and pain in her right side. She had these troubles for three years and frequently was unable to attend school. She has become regular and feels much better since she began taking the Vegetable Compound and attends school regularly.—Mrs. John Toms, Ball St., Cobourg, Ontario.

Every mother who has a daughter suffering from such symptoms should give Lydia E. Pinkham's Vegetable Compound a trial. It is prepared from roots and herbs, and can be taken in safety by young or old. It has been used nearly fifty years, and many, many women owe their good health today to the timely use of Lydia E. Pinkham's Vegetable Compound.

Main Street

Mrs. Geo. Higginson has been visiting relatives in Calgary.

Mrs. P. J. Hardy spent Monday and Tuesday at Edmonton.

Mr. J. H. Elliott and Mr. J. C. Clark have been taking in the Edmonton fair.

Mr. and Mrs. Ivan Archibald, of Sunny Slope, Alta., are spending a few days at their home in Jarow.

Mr. and Mrs. G. A. Tripp returned Tuesday after motoring to Saskatoon and intervening points.

Mr. and Mrs. Jas. Elliott and infant son returned from near Regina last Friday night.

Mrs. Derman left Wednesday for a trip to her son's farm in Saskatchewan.

Mr. W. B. Peterson and Geo. Graham shipped two cars of cattle to Edmonton Monday night.

Mrs. T. Shaw is doing nicely in the hospital at Edmonton, she is expected home about the first of the week.

Mrs. Ivan Archibald left for the Viking Hospital to have her tonsils removed.

Mrs. McKilligan and children of Smiley, Saskatchewan is visiting her mother Mrs. Fluewelling.

Miss M. A. McLellan, of Vancouver, B. C. is spending a few weeks with her cousin Mr. C. T. Hill and other friends.

Miss Clara King of Edmonton spent a few days in the Irma district last week visiting her nephews Mr. Norman and L. B. King. Miss King is on her way to visit friends in Ontario.

Mr. H. C. Cable of the International Harvester Co. was in town the first of the week, arranging details with their new agent Mr. P. E. Jones. Mr. Jones expects a supply of repairs and I. H. C. machinery in a few days.

About twenty boys left Irma Tuesday morning for the Boys camp at Clear Lake, east of Wainwright. A round 100 boys from the different districts between Irma and Chauvin will spend ten days at the big camp. Next Wednesday will be visitors day when all parents and friends of the boys are invited to visit the camp and find out how the boys have been enjoying themselves.

The Sharon's Ladies' Aid will have a bazaar, also raffle of a silk spread on Wednesday afternoon at 2 o'clock, July 26th, 1922 at Coal Springs schoolhouse.

Ice-cream etc. for sale.
Everybody welcome.

LEWISVILLE

A dance was given in the school on June 30th by the Sanders family in honor of Miss Johnson who has been the teacher for considerably over a year, and who is leaving. Her sister, Miss Dorothy came out from Edmonton for a few days. They are both members of the Dominion Amateur Champion Basketball Team.

Mrs. Hughes and children of Edmonton are visitors at Peter Voros'. Road work is now being done on the grades around the Park. Mr. Smith, Park Supt., has been approached on the subject and will recommend that the Park fence be moved back from the road coming out of the river valley from the bridge, and if the Dominion Government is agreeable this will be done.

Lewisville is in the constituency of Ribstone and on account of our member's death an election will be held. J. J. Armstrong is enumerator and the notices are up. McKenna of Hughenden is running on the Independent ticket and Farquharson on the Progressive.

A new shack has been erected on the "old Geo. Smith place" to take the place of the house recently destroyed by fire.

Henry Alm changed his mind about accepting the office of poundkeeper, so the position is at present unfilled. No one seems anxious for the job.

It is rumored that some oil people, on the pretense of fishing, have been going over some ground near here long suspected by old-timers to have possibilities of oil, on account of strange surface indications. We will be content with every sixteenth barrel.

Mr. Gotobed's house at Fabyan is finished.

The blacksmith is doing well, it is said, in his new shop at Fabyan and is being kept busy.

We have had quantities of rain this year, have never lacked for moisture and vegetation of all kinds is green and abundant.

Geo. Rysdale has rented his place to Emil Skogg and has departed from our midst.

A number from around here took in the big dance in Wold's barn near Irma on the 4th.

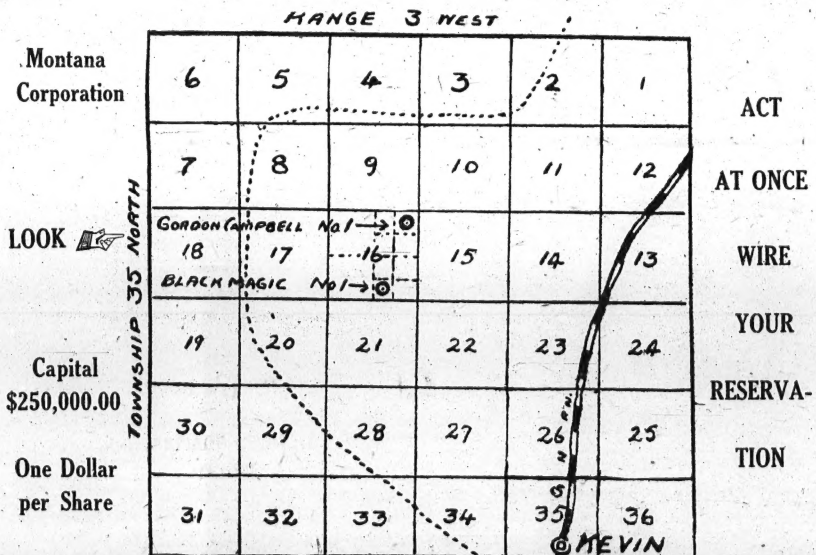

TAKE OUR WORD FOR IT---
